CREDIT APPLICATION

Applicant Information			
Owner Name (Indiv., Org. or Entity)	Authorized Representative	Title	
Owner Address	City	State	Postal Code
E-mail Address	Telephone (include area code)	Fax (include area code)	
Other Contact Information (check one): <input type="checkbox"/> Engineer / Consultant <input type="checkbox"/> Contractor / Builder <input type="checkbox"/> Agent / Other			
Name (Organization or Entity)	Contact Person	Telephone (include area code)	
Mailing Address	City	State	Postal Code
E-mail Address	Telephone (include area code)	Fax (include area code)	
Credit Type Requested (see Credit Policy on Page 2)			
Credit For:			
Submittal Requirement			
<p>1. Certification of Proper Installation, Operation and Maintenance The applicant shall provide written certification that the facilities that are the subject of the credit request are:</p> <ul style="list-style-type: none"> a. Constructed in accordance with plans submitted to obtain approvals for land subdivision or other government or agency permits. b. Operated in a manner to assure that they function as intended. c. Maintained in a manner to assure that they remain as constructed and function as intended. <p>2. Other Documentation The party requesting credit(s) for the mitigation of runoff effects shall provide a hydrologic and/or hydraulic studies, plans, etc. that demonstrates, to the satisfaction of the Storm Water Utility, that the measures taken or proposed meet the requirements for the credit(s) requested.</p>			
Documents Submitted (all should be checked)			
<input type="checkbox"/> Written Certification of Proper Installation, Operations & Main		<input type="checkbox"/> Hydrologic and/or Hydraulic Study, Plan, etc.	
Certification			
<p>Certification: I certify that the information contained in this form and attachments is true and accurate. I understand that failure to comply with any or all of the provisions of the Utility's ordinances may result in notices, fines / forfeitures, stop work orders, permit revocation, and cease & desist orders.</p>

Credit Policy

I. ALLOWABLE CREDITS

1. Maximum Total Credit: The maximum total credit attainable will be 85%.
2. Maximum Credit for Reducing Flow Rate: 60%.
3. Maximum Credit for Reducing the Volume of Discharge: 25%

II. CREDITS FOR REDUCING FLOW RATE

1. **First Tier Credit**
For meeting the minimum standard of limiting the peak discharge from a 4.25-inch, 24-hour storm to that existing prior to development, the user shall be granted a credit of 10%.
2. **Second Tier Credit**
For reducing the peak discharge from a 4.25-inch, 24-hour storm to 0.40 cfs per acre, the user shall be granted an additional credit of 20%.
3. **Third Tier Credit**
For reducing the peak discharge from a 4.25-inch, 24-hour storm to 0.30 cfs per acre, the user shall be granted an additional credit of 15%.
4. **Fourth Tier Credit**
For reducing the peak discharge from a 4.25-inch, 24-hour storm to 0.15 cfs per acre, the user shall be granted an additional credit of 15%.

III. CREDITS FOR REDUCING VOLUME OF FLOW

1. For limiting the maximum 12-hour volume of runoff from a 25-year storm to that existing prior to development, the user shall be granted a full credit of 25%. To receive this credit, at the end of the 24-hour period during which the runoff event occurred, the facilities used for the mitigation of the effects of runoff must be returned to the state existing at the beginning of the runoff event, or the terminal state must be considered in determining credits for reducing flow rate. Alternatively, it may be demonstrated that the conditions at the end of the 24-hour period would not impact the ability of the facilities to mitigate the affects of a second similar runoff event.
2. For reducing the maximum 12-hour volume of runoff for the 25-year storm by an amount less than that set forth in Paragraph III.3.a, the user shall be granted a credit in accordance with the following formula:

$$\text{Credit} = \frac{\text{Runoff without Mitigation} - \text{Runoff with Mitigation}}{\text{Runoff without Mitigation} - \text{Runoff Prior to Development}} * 25\%$$

$$\text{Runoff without Mitigation} - \text{Runoff Prior to Development}$$

3. No credit will be allowed for reducing the volume of flow, unless it exceeds 5%.
